Testing Review

TOTAL POINTS 2

1. What do we mean by exploration versus exploitation?

1 / 1 point

- ☐ Exploitation is trying different things, exploration is sticking with a good thing
- ☐ Exploration is good results, exploitation is bad results
- ☐ Exploration is traveling around, exploitation is being greedy
- ☒ Exploration is trying different things, exploitation is sticking with a good thing

✓ Correct

2. Why do we test multiple QuAMs on operational data?

1 / 1 point

- ☐ Because your testing metrics might not be good ones
- ☒ Because the QuAM that performed best on test data might not be the QuAM that performs best on operational data
- ☐ Because getting multiple answers and combining them always gets you a better answer in aggregate
- ☐ All of the above

✓ Correct
