Complexity in Production Review

TOTAL POINTS 1

1. Why do we need to consider both resources and performance in deploying Machine Learning systems?

1 / 1 point

- ☐ Because sometimes the system needs to run on computing resource constrained systems, like cellphones or lightbulbs
- ☐ Because sometimes we need to make sure the platform has a large enough computing capacity to support a sufficient performance
- ☐ Because sometimes the system needs to have very high performance with a complex model, and need lots of computing resources
- ☒ All of the above

Correct
