Data Warehousing Review

TOTAL POINTS 2

1. Which of these is an important consideration for consolidating data?

   1 / 1 point

   ◉ All of the above

   ○ Data Privacy

   ○ Data pre-processing

   ○ Data accessibility

   ✓ **Correct**
   Correct! All three of these are important considerations for consolidating data.

2. The extraction stage of 'ETL' focuses on which of the following?

   1 / 1 point

   ◉ Where you're going to get the data that you plan to use.

   ○ Transforming your data into a schema that is specific to where it is being loaded.

   ○ Deciding exactly what data to save.

   ○ None of the above.

   ✓ **Correct**
   Correct! You want to think about where your data is coming from and how that impacts the features, format, and other factors involved in your data.
